

QuickTour™

Increase sales with a 3D web-based tour.

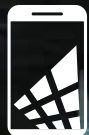

The ability to visualize how each space was going to look and the level of realism and immersion provided by the VR experience using the Head Mounted Display (HMD) has been so effective, it has greatly reduced our leasing cycle and increased the conversion rate from leads to tenants, even prior to project completion.

Investment Property Advisors

Eliminate the struggle most have visualizing 2D floor plans

✔ Pix QuickTour rapidly converts mundane floor plans (PDFs) or confusing blueprints into simple, informative and impactful 3D experiences in less time and money than traditional renderings.

- ✔ Pix QuickTour benefits include:
- ▶ Fast and affordable CAD-accurate
 - ▶ 3D-interactive VR model in 2-3 days
 - ▶ Easy to Use & Visually Realistic
 - ▶ Easy to deploy and accessible from any mobile device, computer or 3D headset.

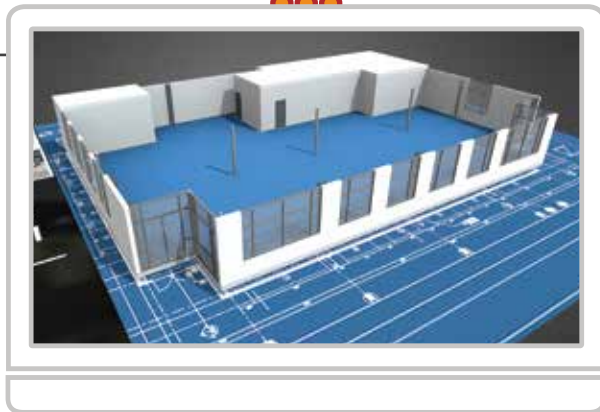

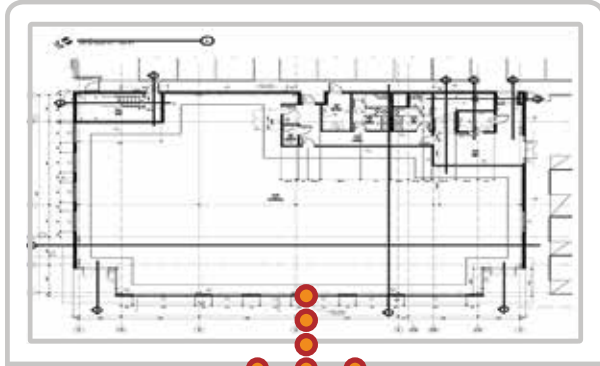

QuickTour™

Customer simply provides:

- ✓ 2D floor plans (CAD or PDF) to scale with at least one reference dimension
- ✓ Either photos, renderings or drawings with vertical dimensions, or a list of measurements
- ✓ Choice of finishes – Interior finishes of floors, walls and other surfaces can be based on photos, renderings, or chosen from our collection of representative surfaces

QuickTour provides:

- ✓ Visually dynamic, highly economical alternative to photos and 2D drawings
- ✓ Whether it is existing or pre-construction, distinguish your listing without stretching the budget.
- ✓ Ideal for representing properties and spaces when time and cost are meaningful constraints
